

## Instructions for Plug & Play Heat Pump Cable Kit

This kit comprises a heavy duty 2.5mm mains flex rubberised cable and a heavy duty 13A UK mains plug

It is designed to allow a swimming pool heat pump with a maximum input power of 3kw or 13A to be connected to a standard UK 13A outdoor socket.

**Important: This kit is supplied on the basis that the outdoor socket that will be used to connect the lead is already protected by an RCD. Do not use the lead and plug without RCD protection.**

If the outdoor socket that is to be used is not protected by an RCD, then please contact an electrician to install an RCD before using this cable and plug kit.

The cable and plug are also supplied separately and the plug is not pre-wired to the cable.

The 13A plug should be wired onto the cable by a competent person so it is wired in a safe manner.

Please only use this kit if you are capable of safely wiring the 13A plug to the cable.

The cable and lead kit are suitable for heat pumps with a maximum input power of 3kw or 13A

**If in doubt, please contact a qualified electrician.**
